DETAILED ACTION

Preliminary Amendment

1. The preliminary amendment filed on 3/24/2005 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are replete with informalities, too numerous to mention specifically and failing to conform with U.S. Patent Office practice. The claims appear to be a literal translation into English from a foreign document. The following noted informalities are merely exemplary thereof. The claims should be revised to conform to U. S. Patent Office practice. Applicant is advised to completely review the claims for errors as the following is not intended to cover all errors.

I- Regarding claim 1, "the assembly", line 11, "the product", in line 13, "the other end", in lines 18-19, and "the connection" in line 22 lack antecedent basis. In claim 1, line 17, "'a pumping system'" should be --a pumping system--.

II- In claim 2, line 4, "a container" is positively recited for a second time. This renders the claims confusing as it raises issues of double inclusion.

III- Regarding claim 3, the phrase "for example:" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Allowable Subject Matter

4. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stoodt 5,012,956, Van Coney 4,842,165, Szczepanski 4,020,978, Williams 3,306,500, Yamawaki et al. 5,303,852, Bensen 2,777,612 and Knoblock 2,671,579 disclose other types of package for viscous products.
